Executive Summary

Overall health across 7 weighted categories

Site profile: AR Events & Wedding Planner is a local event planning agency in Muzaffarpur, Bihar, operating since 2013. The site has a strong technical foundation — server-side rendering, clean URLs, sitemap index, and comprehensive homepage schema. However, 7 critical issues (including a 17MB hero video, a misdirected canonical tag, and a broken booking form) require immediate attention before any growth work begins. Performance is the single lowest-scoring area and will significantly impact rankings in India's mobile-dominant market.

Business Profile

Business Name	AR Events & Wedding Planner	Founder	Amitesh Raaz
Primary Location	Nirala Nagar, Muzaffarpur, Bihar 842001	Secondary	Greater Noida, UP 201318
Phone (Schema)	+91 8873268474	Email	areventsol.2013@gmail.com
Founded	2013 (12+ years)	Deployment	Vercel (static HTML)
Pages	63 HTML pages	Est. Domain Authority	1-12 (Tier-2 city local business)
Services	Wedding Planning (₹85K+), Anniversary (₹25K+), Corporate Events (₹45K+), Birthday (₹35K+), Cultural Events (₹55K+), Religious Ceremonies (₹40K+)		

Core Web Vitals Snapshot

Source: Static code analysis (no PSI API credentials available)

Metric	Mobile Estimate	Status	Target (Good)
LCP (Largest Contentful Paint)	~5–8 seconds	POOR	≤ 2.5s
INP (Interaction to Next Paint)	~300–500ms	NEEDS IMPROVEMENT	≤ 200ms
CLS (Cumulative Layout Shift)	~0.05–0.15	BORDERLINE	≤ 0.1
TTFB (Time to First Byte)	~300–600ms	ACCEPTABLE	≤ 200ms
FCP (First Contentful Paint)	~3–5 seconds	POOR	≤ 1.8s
TBT (Total Blocking Time)	~600–1200ms	POOR	≤ 200ms
Est. Mobile PageSpeed Score	25–40 / 100	POOR	≥ 90

Critical Issues

7 issues requiring immediate fix — these block indexing, harm conversions, or create security risk

CRITICAL

C1 — anniversary-celebrations.html canonical points to the WRONG page

The canonical tag and `og:url` both point to `/cultural-events` instead of `/anniversary-celebrations`. This tells Google to de-index the anniversary page and treat it as a duplicate of cultural events. The `twitter:title` also reads "Traditional Cultural Event Planning."

- Fix: Change canonical to `https://arevents.in/anniversary-celebrations`
- Fix: Change `og:url` and `twitter:title` to match the correct page

File: `anniversary-celebrations.html`

CRITICAL

C2 — Darbhanga location page canonical has a typo ("dharbanga") → resolves to 404

The canonical reads `/locations-bihar/event-management-in-dharbanga` (extra 'h'). Google attempts to canonicalize to a URL that does not exist.

- Fix: Correct to `https://arevents.in/locations-bihar/event-management-in-darbanga`

File: `locations-bihar/event-management-in-darbanga.html`

CRITICAL

C3 — Two different phone numbers in active use — NAP failure

Schema, homepage, and footer use `+918873268474`. About page floating CTAs and contact page meta use `+919006532324`. This NAP inconsistency directly suppresses local pack rankings.

- Pick one primary number and apply it to every page, schema block, and CTA

Files: `index.html` (schema), `about.html` (floating buttons), `contact.html` (meta)

CRITICAL

C4 — Security headers not applied to clean URL routes

Header rules in `vercel.json` use `"source": "/(.*?)\\.html"`. With `cleanUrls: true`, pages are served without the `.html` extension. `X-Frame-Options`, `X-Content-Type-Options`, and `Referrer-Policy` are not sent for any clean URL.

- Fix: Change the source pattern to `"source": "/(.*)"` for all security header blocks

File: `vercel.json`

CRITICAL**C5 — 17MB autoplay hero video destroys mobile performance**

`assets/videos/video1.mp4` is 17 megabytes, downloaded synchronously on every page load. On a 10 Mbps 4G connection (common in Bihar), this takes ~14 seconds before the video can play. No `poster` attribute means users see a blank hero section during buffering.

- Compress to under 3MB:

```
ffmpeg -i video1.mp4 -vcodec libx264 -crf 28 -preset slow -vf
scale=1280:-1 output.mp4
```

- Add `poster="assets/images/hero-poster.webp"` to the `<video>` element
- Add a WebM source for 30–60% additional size savings

File: `index.html`, `assets/videos/video1.mp4` (17MB)

CRITICAL**C6 — `/llms.txt` referenced in `robots.txt` but returns 404**

The file doesn't exist. AI crawlers (Claude, GPTBot, Perplexity) have no structured briefing about the business. This is a 30-minute fix with high GEO impact.

- Create and deploy `/llms.txt` with business name, description, and key page links

Path: `/llms.txt` (missing)

CRITICAL**C7 — Booking form silently fails in production**

`scripts-premium.js` line 588 calls `fetch("/api/bookings", ...)` — this endpoint does not exist on Vercel. The `.catch()` handler silences the error. Every booking form submission is being lost with no user notification.

- Deploy the Express booking backend as a Vercel serverless function, or redirect to a working form service (Formspree, Netlify Forms, etc.)

File: `scripts-premium.js:588`

High Priority Issues

10 issues to fix within 1 week

HIGH

H1 — og:url uses .html extension on ~18 root pages

Every page except the homepage has `og:url` pointing to `*.html` variant while canonical correctly uses clean URLs. Social crawlers (Facebook, LinkedIn, Twitter) follow redirect chains.

Fix: Batch find-and-replace — strip `.html` from all `og:url` values across the project.

HIGH

H2 — faq.html missing <title> tag and canonical

The FAQ page has no `<title>` element — Google generates one algorithmically (usually suboptimal). No canonical means duplicate path risk is uncontrolled.

Fix: Add `<title>FAQ – AR Events & Wedding Planner | Muzaffarpur</title>` and `<link rel="canonical" href="https://arevents.in/faq" />`

HIGH

H3 — No Content-Security-Policy header sitewide (XSS risk)

No CSP anywhere in `vercel.json`. For a site collecting booking and contact form data, this is an active XSS risk vector. Add a global CSP header block to the `vercel.json` catch-all rule.

HIGH

H4 — 5 render-blocking CSS files totalling 156KB

`common.css` (21KB) + `layout.css` (6.2KB) + `components.css` (14KB) + `pages.css` (50KB) + `styles-premium.css` (65KB) — all synchronous, all render-blocking. No critical CSS is inlined. Use the `media="print" onload="this.media='all'"` deferral pattern and inline ~2KB of hero/nav critical CSS.

HIGH

H5 — No phone number in header; no floating WhatsApp widget

For Indian local service businesses, a click-to-call button in the navbar and a floating WhatsApp widget are conversion-critical. Both are currently buried in the footer. This is the single highest-converting UX fix for the Bihar mobile market.

HIGH

H6 — AggregateRating schema missing despite 4.8 rating on testimonials page

The testimonials page states "4.8 Average Rating / 100+ Happy Clients" but has zero `AggregateRating` or `Review` schema. This is the highest-impact missing schema — it enables star ratings in search results for this business.

HIGH**H7 — Service schema absent on all 6 service pages**

The homepage has an `ItemList` of services (structurally broken — `position` placed inside `Service` instead of `ListItem`), but all individual service pages (wedding-planning, corporate-events, etc.) have zero schema. Each service page needs its own `Service` block with `provider`, `areaServed`, and `offers`.

HIGH**H8 — BreadcrumbList schema missing on all sub-pages**

Zero breadcrumb schema exists anywhere on the site. `BreadcrumbList` is the highest-value addition for rich results affecting all 63 pages. Add to every sub-page.

HIGH**H9 — 33 of 44 location pages are near-duplicate doorway page risk**

The `/wedding-bihar/`, `/anniversary-bihar/`, and `/birthday-bihar/` city pages have only the city name swapped. Same hero text, same FAQs, same service cards, same hero background image across all 11 cities — far below the 60% unique content quality threshold.

- Option A: Add 300+ words of genuine city-specific content to each page (venues, local customs, testimonials)
- Option B: Consolidate, self-canonical back to main service page, remove from sitemap

HIGH**H10 — 122KB PNG logo in navbar; existing SVG not used**

`arlogo.png` (122KB) is used in the navbar while `logo2.svg` already exists and is used for the favicon. SVG would be ~1-5KB and vector-perfect. Also contributes to CLS (no `width / height` on the PNG element).

File: `index.html` `` → replace with `assets/logo2.svg`

Schema / Structured Data Audit

Schema score: 45/100 — Homepage schema is strong; all sub-pages are empty

Schema Block	Location	Status	Issue
LocalBusiness	index.html	WARN	Should be EventPlanner @type; SVG image not valid; Greater Noida address missing
Organization	index.html	FAIL	Missing @id — disconnected from LocalBusiness entity
WebSite / SearchAction	index.html	FAIL	SearchAction points to ?s= — no search function exists on static site
ItemList (Services)	index.html	FAIL	position inside Service (wrong); should be on individual service pages
FAQPage	index.html	INFO	Valid — but Google restricts rich results to gov/healthcare; AI/LLM citation benefit remains
BreadcrumbList	Sitewide	FAIL	Completely absent on all pages
Service schema	All 6 service pages	FAIL	Zero schema on any service page
AggregateRating	testimonials.html	FAIL	Missing despite 4.8 rating and 100+ reviews stated in HTML
Review	testimonials.html	FAIL	5 named testimonials present in HTML — zero Review schema
FAQPage	faq.html (dedicated)	FAIL	15 Q&A pairs present in HTML but zero schema on this page

Sitemap Audit

4 sub-sitemaps covering 61 URLs total

Check	Result	Detail
XML format validity	PASS	All 4 files well-formed with correct namespaces
URL count	PASS	61 total URLs — well within 50K limit
PASS		

Check	Result	Detail
Protocol consistency (www vs non-www)		Non-www canonical is correct; GSC must be configured for non-www property
lastmod dates	FAIL	All 61 URLs show identical 2026-04-07 — templated, not real modification dates
/gallery page in sitemap	FAIL	gallery.html exists but is absent from all sitemaps
Image sitemap	FAIL	Image namespace declared in sitemap-main.xml but zero <image:image> entries
Thin location pages	FAIL	33/44 location pages near-duplicate (wedding/ anniversary/birthday city pages)
<priority> tags	INFO	Present on all URLs — ignored by Google since 2023; remove for hygiene

Content Quality & E-E-A-T

Content score: 54/100 — Strong foundation but critical gaps in E-E-A-T depth

E-E-A-T Dimension	Score	Key Gaps
Experience	28/50	Testimonials use initials only (RK, SP) — no photos, no platform attribution, no venue names. Portfolio uses "Event 1/2/3" labels. No case studies.
Expertise	30/50	No blog or editorial content. Service pages are surface-level. No Bihari wedding tradition specificity. Feature card block duplicated verbatim across all service pages.
Authoritativeness	22/50	No JustDial/Sulekha/WedMeGood presence. "Award-Winning Team" claim — no award named. Portfolio lists Goa, Jaipur, Bangalore events but business is Muzaffarpur-based — unexplained.
Trustworthiness	34/50	Dual phone numbers (NAP failure). Gmail primary contact. "4.8 Rating" has no source. No refund/cancellation policy. availableLanguage: "hi" in schema but zero Hindi content on site.

Page	Est. Body Words	Minimum	Status
Homepage	~1,100	500	PASS
About page	~280	500	FAIL — Thin
Wedding Planning	~520	800	BORDERLINE
Cultural Events	~500	800	FAIL
Anniversary Celebrations	~490	800	FAIL
Location pages (city-specific)	~400	500–600	NEAR THRESHOLD

AI Search Readiness (GEO)

GEO score: 54/100 — Technical access is open; entity authority is weak

Platform	Score	Key Factor
Google AI Overviews	42/100	FAQPage schema helps; GBP absence severely limits local query visibility

Platform	Score	Key Factor
ChatGPT (Web Browsing)	38/100	No llms.txt; no third-party citations; FAQ content too short for confident citation
Perplexity	55/100	SSR and structured content are favorable; location pages add geographic depth
Bing Copilot	48/100	Schema and SSR assist; no Bing Places verification evident

KEY GEO GAP

FAQ answers average 28–32 words — AI citation requires 134–167 words per answer

The FAQ page has the right questions but answers are too short to be confidently cited by AI systems. Expand each answer with context, a specific example, a statistic, and a logical next step. Also: add inline `FAQPage` schema to each service page for multi-URL AI citability.

Search Experience Optimization (SXO)

SXO Gap Score: 53/100 — Homepage is a brand page trying to rank for transactional local queries

Target Query	Expected Page Type	Current Match	Gap
wedding planner muzaffarpur	Local Aggregator + Map Pack	NO	Homepage is a brand marketing page — wrong page type
event management bihar	Hub/Directory + Informational	PARTIAL	Location pages exist but have low internal link equity
wedding planner bihar	Local Aggregator	NO	No GBP; no aggregator presence; brand-only signals

Hero Section: Current vs Recommended

CURRENT — NO GEO SIGNAL, NO TRUST, NO PHONE IN HERO

[Logo] [Home] [Services v] [Portfolio] [About] [Pricing] [Contact] [Book Now]

[17MB Autoplay Video Background]
H1: "Turning Moments Into Magic"
"Where Your Love Story Becomes a Grand Celebration"
[Book Your Event] [Explore Services]

RECOMMENDED — LOCAL SIGNALS + TRUST BAR + MULTI-CHANNEL CTA

[Logo] [Home] [Services v] [Portfolio] [About] [Pricing] [Contact] [+91 88732 6847]

[Optimised Video / Hero Image Background]
[Trust bar: ★ 4.8 Google · 150+ Events · Since 2013]
H1: "Turning Moments Into Magic"
Sub: "Muzaffarpur's Trusted Wedding & Event Planners – Bihar"
[Book Your Event] [WhatsApp Us Now] [View Our Work →]

[Floating WhatsApp icon – fixed bottom-right]

User Persona Scores

Persona	Score	Biggest Gap
NRI / Out-of-State Remote Planner	45/100	No video proof, no WhatsApp widget, no remote planning process
Corporate HR Manager (Patna)	51/100	No client logos, no capacity info, no corporate-specific inquiry form
Budget-Conscious First-Time Planner	64/100	Pricing not visible on service pages — must navigate to /pricing
Wedding-Planning Bride (Primary Target)	65/100	Portfolio uses "Event 1/2/3" labels; no couple names; no Instagram embed
Comparative Shopper (brand search)	72/100	Gmail email is a trust detractor; unverified testimonials

Backlink Profile & Link Building Opportunities

No API credentials available — qualitative analysis based on site signals and industry benchmarks

Metric	Estimated Range	Note
Domain Authority (est.)	1–12	Typical for Tier-2 city local business without active link building
Referring Domains (est.)	0–15	Category median for local Bihar service businesses
Social profiles (confirmed)	3	Facebook, Instagram, YouTube — all nofollow
Toxic link risk	Low	No evidence of link schemes; static site not targeted by negative SEO

Top Link Building Opportunities

1. Google Business Profile

Claim/verify at business.google.com. Single most impactful local citation. Enables Map Pack placement for "wedding planner Muzaffarpur" queries and feeds Google AI Overviews.

Effort: 3–5 hrs · Cost: Free · Impact: Very High

2. Justdial.com Listing

DA ~72. Dominant Indian local directory. Submit exact NAP match: "AR Events & Wedding Planner", Nirala Nagar, Muzaffarpur, +918873268474.

Effort: 30 min · Cost: Free · Impact: High

3. Sulekha.com Listing

DA ~60. Popular for wedding/event discovery in Bihar and UP. Especially strong for corporate event inquiries.

Effort: 30 min · Cost: Free · Impact: High

4. WedMeGood Vendor Profile

DA ~55. India's leading wedding vendor platform. Allows portfolio photos, client reviews, and a profile link. Category: Wedding Planners / Bihar.

Effort: 2 hrs · Cost: Free basic · Impact: High

5. Bihar Chamber of Commerce

State-level chamber membership creates an authoritative regional citation with high trust relevance for "Bihar business" queries.

Effort: 2–4 hrs · Cost: Annual fee · Impact: High

6. Local Press (Prabhat Khabar, Hindustan Bihar)

Bihar-specific Hindi newspapers with digital editions (DA 50–70). Pitch angle: "Muzaffarpur event company's 12-year anniversary" or Bihar wedding trends feature.

Effort: 5+ hrs · Cost: Free (earned) · Impact: Very High

7. WeddingBazaar / ShaadiSaga

Growing Indian wedding platforms. DA 42–48. Free vendor registration with portfolio upload capability.

Effort: 45 min each · Cost: Free · Impact: Medium

8. Eventbrite Organizer Profile

Even without paid events, an organizer profile creates a brand citation from a DA ~90 domain — one of the highest-authority free citations available.

Effort: 30 min · Cost: Free · Impact: Medium

Prioritized Action Plan

40 actions across 4 phases — sequenced by impact and dependency

Week 1 — Stop the Bleeding (Critical Fixes)

- 1** Fix `anniversary-celebrations.html` canonical, og:url, and twitter:title — currently pointing to cultural-events page
FILE: ANNIVERSARY-CELEBRATIONS.HTML · 5 MIN
- 2** Fix Darbhanga canonical typo "dharbanga" → "darbhanga" in `locations-bihar/event-management-in-darbhang.html`
FILE: LOCATIONS-BIHAR/EVENT-MANAGEMENT-IN-DARBHANGA.HTML · 2 MIN
- 3** Unify phone numbers sitewide — pick one primary number (+918873268474 recommended) and remove +919006532324 from `about.html` and `contact.html`
FILES: ABOUT.HTML, CONTACT.HTML · 1 HR
- 4** Fix `vercel.json` security headers: change `"source": "/(.*)\\.html"` to `"source": "/(.*)"` for all security header blocks
FILE: VERCEL.JSON · 15 MIN
- 5** Create and deploy `/llms.txt` with business description, key page links, and founder name
NEW FILE: /LLMS.TXT · 30 MIN
- 6** Add phone number to navbar + add floating WhatsApp widget to all pages
FILES: ALL HTML PAGES · 2 HRS
- 7** Batch fix og:url on all ~18 root pages — strip .html extension to match canonical clean URLs
ALL ROOT HTML FILES · 30 MIN (FIND/REPLACE)
- 8** Add `<title>` and canonical to `faq.html`
FILE: FAQ.HTML · 5 MIN
- 9** Fix the `/api/bookings` silent failure — deploy Express backend as Vercel serverless function or redirect to Formspree/Netlify Forms
FILE: SCRIPTS-PREMIUM.JS:588 · 2-4 HRS
- 10** Replace `arlogo.png` (122KB) with `logo2.svg` in navbar; add width and height attributes
FILE: INDEX.HTML · 15 MIN

Week 2 — Performance Recovery

- 11

Compress video1.mp4 from 17MB to under 3MB using FFmpeg; add poster="assets/images/hero-poster.webp" attribute

FILE: ASSETS/VIDEOS/VIDEO1.MP4 · 2 HRS
- 12

Inline critical CSS (~2KB) for hero/nav; defer remaining 5 CSS files with media="print" onload pattern

FILES: INDEX.HTML + ALL CSS · 4 HRS
- 13

Add defer attribute to <script src="scripts-premium.js"> tag

FILE: INDEX.HTML · 2 MIN
- 14

Resize all service images from 1.3–2.1MB to under 100KB each (max 800px wide, WebP quality 75–80)

FILES: ASSETS/IMAGES/SERVICES/ · 2 HRS
- 15

Merge the 14 DOMContentLoaded handlers into one; wrap scroll handlers in requestAnimationFrame; remove duplicate scroll listener

FILE: SCRIPTS-PREMIUM.JS · 3 HRS
- 16

Add <link rel="preconnect" href="https://cdnjs.cloudflare.com"> to all pages (Font Awesome CDN currently missing preconnect)

ALL HTML PAGES · 30 MIN
- 17

Remove incorrect Poppins font preload from contact.html, about.html, pricing.html, book.html (Poppins is not used on this site)

4 HTML FILES · 15 MIN

Week 3 — Schema & Content Fixes

- 18

Add AggregateRating + Review schema to testimonials.html (4.8 rating, 100 reviews, 5 individual reviews)

FILE: TESTIMONIALS.HTML · 1 HR
- 19

Add individual Service schema blocks to all 6 service pages with provider, areaServed, and offers

6 SERVICE HTML FILES · 3 HRS
- 20

Add BreadcrumbList schema to every sub-page

~50 HTML FILES · 2 HRS (TEMPLATED)
- 21

Change LocalBusiness @type to EventPlanner; fix image from SVG to og-image.jpg; add Organization @id

FILE: INDEX.HTML · 30 MIN
- 22

Remove invalid SearchAction from WebSite schema (no site search function exists)

FILE: INDEX.HTML · 5 MIN
- 23

Add /gallery to sitemap-main.xml; implement image <image:image> entries for gallery, portfolio, and service pages

FILE: SITEMAP-MAIN.XML · 1 HR
- 24

Expand About page from ~280 words to 500+ — add founder bio, team intro, company milestones timeline

FILE: ABOUT.HTML · 3 HRS (COPYWRITING)

- 25 Add Content-Security-Policy header to vercel.json global rule
FILE: VERCEL.JSON · 30 MIN

Month 2 — Authority & Content Growth

- 26 Register and verify Google Business Profile; upload 20+ event photos; pre-populate Q&A; request reviews from past clients
BUSINESS.GOOGLE.COM · 3–5 HRS

- 27 Submit to Justdial, Sulekha, WedMeGood, WeddingBazaar with full NAP match and portfolio photos
4 PLATFORMS · 4 HRS TOTAL

- 28 Replace Gmail (areventsol.2013@gmail.com) with branded email (contact@arevents.in) across all pages
ALL PAGES + DNS SETUP · 1 HR

- 29 Differentiate or consolidate 33 near-duplicate location pages (add city-specific venues, local testimonials, cultural context)
33 HTML FILES · 15–20 HRS (CONTENT)

- 30 Update lastmod dates in sitemaps to actual file modification timestamps; remove all <priority> tags
4 SITEMAP FILES · 1 HR

- 31 Add GA4 analytics tag to all pages — currently no analytics anywhere on the site
ALL HTML PAGES · 1 HR

- 32 Name/cite the "Award-Winning Team" claim (award name, issuing body, year) — or remove the claim
FILE: INDEX.HTML · 30 MIN

- 33 Remove availableLanguage: "hi" from ContactPoint schema until Hindi content is added to the site
FILE: INDEX.HTML · 5 MIN

Month 3 — Long-Term Growth

- 34 Launch a blog with 4 cornerstone articles: "Wedding Planning Checklist Muzaffarpur 2026", "Top 10 Wedding Venues in Bihar", "Bihari Wedding Traditions Guide", "Corporate Event Planning in Patna"
NEW BLOG SECTION · 20–30 HRS (COPYWRITING)

- 35 Expand FAQ answers from 28–32 words to 134–167 words each; add inline FAQPage schema to each service page
FAQ.HTML + 6 SERVICE PAGES · 6–10 HRS

- 36 Implement IndexNow — generate key, create verification file, add post-deploy submission script
NEW FILES + VERCEL DEPLOY HOOK · 2 HRS

- 37** Convert headings to question format ("Why Is AR Events the Top Wedding Planner in Muzaffarpur?") and open each section with a direct 50-word factual answer
ALL SERVICE + LOCATION PAGES · 8 HRS
- 38** Pitch local Bihar press (Prabhat Khabar, Hindustan Bihar digital edition) for earned media coverage
OUTREACH CAMPAIGN · 5+ HRS
- 39** Add srcset and sizes to all hero and service images for responsive delivery (different sizes for mobile vs desktop)
ALL HTML PAGES · 3 HRS
- 40** Replace Google Maps always-on iframe with static map image + click-to-activate pattern to eliminate Maps API TBT overhead
ALL PAGES WITH MAP EMBED · 1 HR
